

## Translating Earth Science:

The Earth Science website is , <http://www.annarborearthscience.weebly.com>

All of the lectures and most of the homework is found on this website. If you have problems taking notes because english is not your first language, there is an easy way to translate the lectures and homework, it is google translate ( <http://translate.google.com> ) .

Step One:

Goto the Earth Science website and open a lecture:

**Unit 1: Cosmology and Earth's Place in Space**

**Objectives:**

E5.1b - Describe how the Big Bang theory accounts for the formation of the universe.

E5.1c - Explain how observations of the cosmic background radiation have helped determine the age of the universe.

Copy the text by highlighting it and right click (copy)

Step Two:

Open Google Translate on your web browser, pick the two languages you wish to translate from and to, and paste the highlighted text on the translate from side.

Google
